 \*\* Haddii Td (teetano & Diphtheria) aan ilmaha laga tallaalin markay 7 jirsadeen ka dib; waa in la tallaala 10 sanno ka dib markii lallaalkii ugu dambeeyey la siiyey.  
 \*\*\* Ilmaha da'doodu u dhexeyso 11 ilaa 15 waxaa loo ballamin karaa laba tallaalka oo cagaarshowga noociisa B ah haddii loo baahdo in sidaa la yeelo.

**Si dugsi looga dhigto Minnesota, ilmuhu waa in ay keenaan dugsiyada caddeyn tusinaysa in ay qaateen dhamaan tallaalka looga baahan yahay ama ay ka buuxiyaan dugsiyada foomka ka kaaftoonka ee sharciga ah.**

Waalidku waxay buuxin karaan foomka ka kaaftoonka oo ay ka soo saxiixayaan adeegaha rugta xanaanada ilmaha ama diidmo uu ku saxiixan yahay waalidka/qofka ilmaha ka mas'uulka ah oo nootaayo la soo mariyey.

Waxaa lagu talinayaa in ilmaha ka yar 5ta sanno laga tallaalo nimoonyada laakiin taasi khasab maahan loogamana baahna dugsiyada. I Imahoo dhan waa in laga tallaala cagaarshowga nooca B - ma ahan in sharci ahaan dugsiyada uun looga baahan yahay oo keliya.

Wixii akhbaar dheeri ah fadlan wac dhakhtarkaaga, rugtaada caafimaad, ama xafiiska bixiya qorshahaaga caafimaadka.
