The district has been awarded 7 consecutive awards for excellent, comprehensive financial reporting by the Association of School Business Officials. These honors reflect the district’s commitment to transparency and accuracy in budgeting and accounting.

Our school district is growing rapidly. The population of our community is estimated to increase 60 percent by 2040*. Eastern Carver County Schools has embraced the challenges of growing enrollment, changing learning environments, technology advancements, and an ongoing need for school safety. Over the past few years, we have successfully implemented facility additions, digital learning tools, and improvements to safety and security. This was made possible by the 2013 and 2015 referenda.

An exceptional education is a cornerstone of our growing community, and we continue to provide supportive and active learning environments for each student. As our district continues to grow, we are investing in our students and programs – starting from early childhood all the way through high school graduation – to give our kids a better start in school and life. Our teachers and our schools support the children in our community every day. When we all invest in education, future generations are more successful. Investment in our children’s education is an investment in the future of our community. We are grateful for your support.
